PROFILE

Informatics graduate from Universitas Islam Indonesia with a GPA of 3.81/4.00 and hands-on experience developing backend, web, desktop, and mobile applications through academic, personal, and freelance projects. Currently working as a Backend Developer Intern at Badan Sistem Informasi, Universitas Islam Indonesia since December 2025, contributing to RESTful API development using Laravel and Lumen, database and ERD design, API testing, frontend integration, and collaborative development with Git and GitLab. Also contributed to MCP and AI service integrations for data summaries and AI-powered chat features. An AWS re/Start graduate who is adaptable, detail-oriented, and motivated to build reliable, maintainable software while contributing effectively from day one.

EDUCATION

Universitas Islam Indonesia - **Yogyakarta, Indonesia** **Sep 2021 - Jan 2026**
Bachelor's Degree in Informatics, GPA 3.81/4.00 from 144 credits

EXPERIENCE

Badan Sistem Informasi Universitas Islam Indonesia - Yogyakarta, Indonesia **Dec 2025 - Present**

Junior Staff – Backend Developer (Internship)

- Develop and maintain RESTful APIs using PHP, Laravel, and Lumen, including CRUD operations, request validation, data processing, and structured API responses.
- Implement Model Context Protocol (MCP) integration for AI-generated summaries and AI-powered chat features within an asset management module.
- Design MySQL database structures and ERDs, manage databases using DBeaver, and perform API testing with Postman.
- Collaborate with frontend developers on system integration and debugging while using Git and GitLab for version control within an Agile/Scrum environment.

PROJECTS

- **Park Masjid** - Android application integrated with Internet of Things (IoT) devices for real-time mosque parking availability using Kotlin and Firebase |
  Undergraduate Thesis, Universitas Islam Indonesia
- **Comic Reader Application** - Cross-platform comic reader with multi-source integration and Firebase synchronization using Flutter and Dart | *Personal Project*

- **OpsFlow** - IT service desk and asset operations platform with ticket workflows, RBAC, notifications, and audit trails using Laravel, React, TypeScript, PostgreSQL, and Docker | *Personal Project*
- **OrderForge** - Order and inventory platform with race-safe checkout, idempotent payments, event-driven processing, and monitoring using Laravel, Next.js, PostgreSQL, and Docker | Personal Project
- **MoneyTrack** - Offline-first personal finance mobile app with multi-wallet tracking, cash-flow analytics, and OTA updates using React Native, Expo, and TypeScript | Personal Project
- **Client Website** - Full-stack web application developed using Laravel, Vue.js, Vite, and MySQL based on client requirements | *Freelance Project*

SKILLS

- **Languages:** Bahasa Indonesia (Native) | English (Conversational)
- **Programming Languages:** PHP • Java • Kotlin • Dart • TypeScript
- **Backend:** Laravel • Lumen • RESTful APIs • Model Context Protocol (MCP)
- **Mobile:** Android (Kotlin, Java) • React Native (Expo) • Flutter (Dart)
- **Databases & Cloud:** MySQL • PostgreSQL • Firebase • Cloud Firestore • AWS
- **Frontend/Web:** HTML • CSS • JavaScript • Bootstrap • Vue.js • React • Next.js
- **Tools:** Postman • DBeaver • Git • GitLab • GitHub • VS Code • Antigravity • Android Studio • Docker • Vite
- **Concepts:** Object-Oriented Programming (OOP) • Model-View-Controller (MVC) • CRUD • ERD • Database Design • API Testing • AI Integration • Agile/Scrum

CERTIFICATIONS AND TRAINING

Certificates: CEPT - CILACS UII, Score 439 (valid July 2025 - July 2027) | Machine Learning: Special Skill (2025) | Code Generations and Optimization: Hacktiv8 Indonesia & IBM SkillsBuild (2025) | Cyber Threat Management: Cisco (2023) | Devcoach 157 Back-End - Clean Architecture: Dicoding (2024)

Training: Software Engineering - RevoU (2023) | AI API Integration - Hacktiv8 (2026) | Machine Learning - Dicoding (2026) | Python - Dicoding (2026) | Generative AI - Dicoding (2026) | AWS re/Start Program - Orbit Future Academy (Sep 2026)

AWARDS & PUBLICATIONS

- **Best team in Informatics Expo subject Design Thinking -** *Informatics Department of Universitas Islam Indonesia* **- Yogyakarta, Indonesia (Jan 2022)**
- **Rancang Bangun Aplikasi Parkir Masjid Berbasis Android dan Firebase** - Technologia: Jurnal Ilmiah**, SINTA 4 Accredited - (Jan 2026)**
